Lionheart Health Top 25 eShop Offerings

25 requested product groups • Evidence and related intellectual property • October 9 2026

Devices, supplements, meals and research offerings in the requested order. All requested items are included; enhanced peptides and exosomes share one entry to resolve the duplicated numbering. Store listings and related program pages support this summary. Unverified standalone listings are identified, and third-party products retain their own evidence and IP.

eShop offering	Purpose and supporting data	Related patents and offering status
1 Lionheart 240 Stimulus™	Professional four-channel electrotherapy platform supporting Lionheart tissue-specific software. Underlying device functions and investigational regenerative applications have different regulatory status.	Related bioelectric / Klotho patents K; platform IP does not establish efficacy of every software program.
2 Lionheart 240 Portable™	Compact home-use stimulator for continued clinician-directed programs; store describes a lower-powered complement to the clinical system. No separate controlled outcome dataset reviewed.	Related Lionheart signaling IP K; portable-specific claims and indication clearance require confirmation.
3 BodStim™	Wearable EMS exercise suit for conditioning and muscle activation. Company reports: grip +8–15%, leg power +10–25%, walking distance +8–18% in selected studies. [A]	Related Klotho and muscle protein-expression estate K; medical regeneration applications investigational.
4 SynovaWave™	Bedside adipose-tissue processor distributed for professional regenerative workflows. Historical cell-therapy data do not establish efficacy of this processor or every downstream use.	Supplier equipment IP; Lionheart-owned processor patent not verified. Specific eShop SKU not located.
5 Brain Band™	Lionheart bioelectric brain-health platform. Early program reports: memory +12–34%, attention +15–30%, mood +18–35%, stress −15–45%; not proof for each disease indication. [B]	Related Klotho / neurotrophic signaling IP K. Standalone current store SKU not verified.
6 ErectiStim™	Sexual-health bioelectric program targeting vascular and tissue-support pathways; used within personalized multimodality research. No verified product-specific controlled outcome dataset.	Related vascular IP V and Klotho K. Software / treatment offering; separate device SKU unverified.
7 OrthoStim™	Joint-health signaling program paired with strengthening and selected adjuncts. Early reports: pain −40–65%, WOMAC +35–50%, walk performance +12–22%. [C]	Related OPG US 11,691,007 and Klotho K; complete combination claim mapping needed.
8 EyeCell™ Skaphor	Microcurrent and optical stimulation vision-wellness platform. Store reports small pilot improvements in ~4/5 participants; controlled results for the exact hardware configuration not verified.	Lionheart bioelectric signal IP K plus supplier platform technology; retinal disease treatment investigational.
9 Wave Eye	Microcurrent cosmetic eye-area visor for puffiness, fine lines and under-eye care; works with AXION Wave system sold separately. No verified visual-acuity improvement trial.	Third-party device / serum technology. Lionheart-owned device patent not verified.
10 HairCell™ cap portfolio	Requested modalities: PEMF, red-light, NioStem and bioelectric caps. Store lists NioStem wearable hair cap; complete four-modality inventory not verified. HairCell density reports ~30% at 12 weeks. [C]	NioStem uses its own technology; PEMF / light suppliers have separate IP. HairCell signals relate to Klotho K.
11 Hair peptide products	Topical scalp-support products include Cura peptide serum and Peptonix listings; Lionheart's peptide blend may accompany HairCell Plus. No verified controlled results for every formulation.	Formulation / supplier IP varies. Lionheart peptide-combination filings reported; full claim scope unverified.
12 Skin serums	Topical skin-support portfolio for hydration, texture and cosmetic renewal, including clinician-selected peptide / Klotho-oriented serums. Evidence must be assessed by formulation.	Supplier formulations and trademarks; related signaling patents do not automatically cover topical serums.

Lionheart eShop Offerings Continued

eShop offering	Purpose and supporting data	Related patents and offering status
13 SkinStim™	Bioelectric skin program with selected light, PEMF, EMS, PRF and serums. Cultured-cell mRNA: collagen I +35.4%, III +44%, Klotho +420%; small clinical case reports. [D]	Related Klotho K and regenerative signaling estate; full Plus product coverage not verified.
14 Second Brain™ Gut Health	Gut–brain bioelectric program plus microbiome testing, nutrition and supplements. Store offers Gut Intelligence testing; no verified quantified complete-program outcomes.	Related Klotho K and inflammation / neuromodulation IP; standalone current hardware SKU unverified.
15 Metabolic Meals	Third-party fresh, chef-prepared, gluten-free meal delivery; listed selection of 6–22 meals weekly. Supports structured nutrition; no verified Lionheart-specific clinical outcome trial.	Meal service and brand IP; no Lionheart-owned meal-service patent verified.
16 Rejuvant® Ca-AKG	Sustained-release calcium alpha-ketoglutarate supplement, including Pro formula. Published observational biological-age findings are not proof of longer life or disease prevention. [E]	Third-party LifeAKG formulation / release technology; exact patent numbers and licensed rights not reviewed.
17 BioPRF	Professional autologous platelet-rich fibrin preparation with investigational bioelectric enhancement. Added clinical benefit over conventional PRF remains unconfirmed.	Bioelectric-enhanced PRF described as patent pending; filing number / scope unverified. Store SKU not located.
18 Bioelectric enhanced peptides and exosomes	Investigational biologic conditioning / delivery offerings intended to improve activity or uptake. No verified controlled human benefit for the complete combinations.	Peptide-enhancement filing reported pending; exosome-specific claims unverified. Research access differs from retail sale.
19 VascuStim™ Wound Healing	Vascular / wound bioelectric research with optional adjuncts. Historical reports: 8/8 had accelerated wound progression; separate cell series 12/16 avoided anticipated amputation. [F]	Related homing / angiogenesis IP, Klotho K and vascular V; not proof of a retail wound-healing indication.
20 Hearing products	Requested auditory-health group: EarCell research, selected hearing-support products and clinician-guided rehabilitation. Current specific hearing-device inventory and proprietary recovery results unverified.	Supplier rights vary; EarCell relates to regenerative / Klotho IP K. Hearing restoration remains investigational.
21 Sleep aid products	Store examples include NeuroRester Deep Sleep Optimizer, a wearable digital-PEMF relaxation system. General wellness support; product-specific controlled insomnia outcomes not reviewed.	Third-party proprietary digital-PEMF technology; no Lionheart-owned sleep-device patent verified.
22 Signal Relief and pain products	Reusable Signal Relief patches / inserts and BioWaveGO electrotherapy provide drug-free comfort options. Store describes BioWaveGO as FDA-cleared; exact label / trial evidence needs product review.	Third-party signal-patch and BioWave high-frequency technology; supplier patent numbers not reviewed.
23 SNIP Nutrigenomics supplements	DNA-informed personalized nutritional support. Site references SNIP; eShop separately lists The CODE genetic-test / custom-supplement system. Their equivalence is not verified.	Supplier genetic interpretation / formulation IP; no verified Lionheart-owned supplement patent or controlled outcome dataset.
24 Heart Affect™ by LL Prosper	Botanical heart-health supplement; store title “Live Long Prosper Heart Effect.” Seller reports 60-day placebo-controlled study: ApoB −15%, 73% responders; underlying report not independently reviewed.	Third-party formulation / brand rights; patent number and Lionheart license scope not verified.
25 NeuraLed Photobiomodulation	Axion brain-light platform: 21 programmable zones and 660 / 810 / 1070 nm wavelengths. Supports personalized wellness sessions; no controlled Axion-specific clinical outcome trial reviewed.	Third-party PBM architecture / technology; patent numbers and Lionheart ownership not verified.

Evidence and IP notes Company and seller reports are not independently validated here. K = issued Klotho patents US 11,471,686 / 12,226,639; V = related vascular patent US 11,167,141. Related patents do not establish coverage of every device, formulation or use. Conventional retail products, software, clinic equipment and investigational biologics have different access and regulatory requirements. Research entries are not represented as unrestricted retail products.
